Compare

v5.3.0

snicoll released this 3 days ago · 7 commits to master since this release

⭐ New Features

- Allow cache eviction for ConcurrentLruCache #25963
- Support Optional for query parameters in UriBuilder and UriComponentsBuilder #25951
- Deprecate `StringUtils.isEmpty(Object)` and replace remaining usage (e.g. with `ObjectUtils.isEmpty`) #25945
- Introduce RouterFunction attributes #25938
- Discover `@Sql`, `@SqlConfig`, `@SqlGroup`, & `@SqlMergeMode` on enclosing class for nested test class #25913
- Support Propagation.NEVER for disabling test-managed transactions #25909

Kubernetes Release Team

- Overview
- Specific responsibilities
- Kubernetes Release Team roles
- Other activities of the Release Team
- Release Team Selection
- Milestone Maintainers
- Filing exceptions

Overview

The Kubernetes Release Team is embedded within SIG Release and is responsible for the day to day work required to successfully release while the SIG at large is focused on the continued improvement of the release process. Historically the Release Manager (previously Release Czar) and later Release Team has assumed the following responsibilities
