Growth Projects

architect

architect offers a simplistic plaintext manifest and npm script based workflows for creating, deploying, working offline and more with cloud functions.

Intern

Intern is a complete test stack for JavaScript or TypeScript designed to help you write and run consistent, high-quality test cases for your JavaScript or TypeScript libraries and applications.

Mocha

Mocha is a feature-rich JavaScript testing framework providing a command-line interface for Node.js as well as in-browser project testing capabilities.

Node-RED

Node-RED is a flow-based programming environment built on Node.js – commonly used in the IoT space – and aimed at creating event-driven applications that can easily integrate APIs and services.

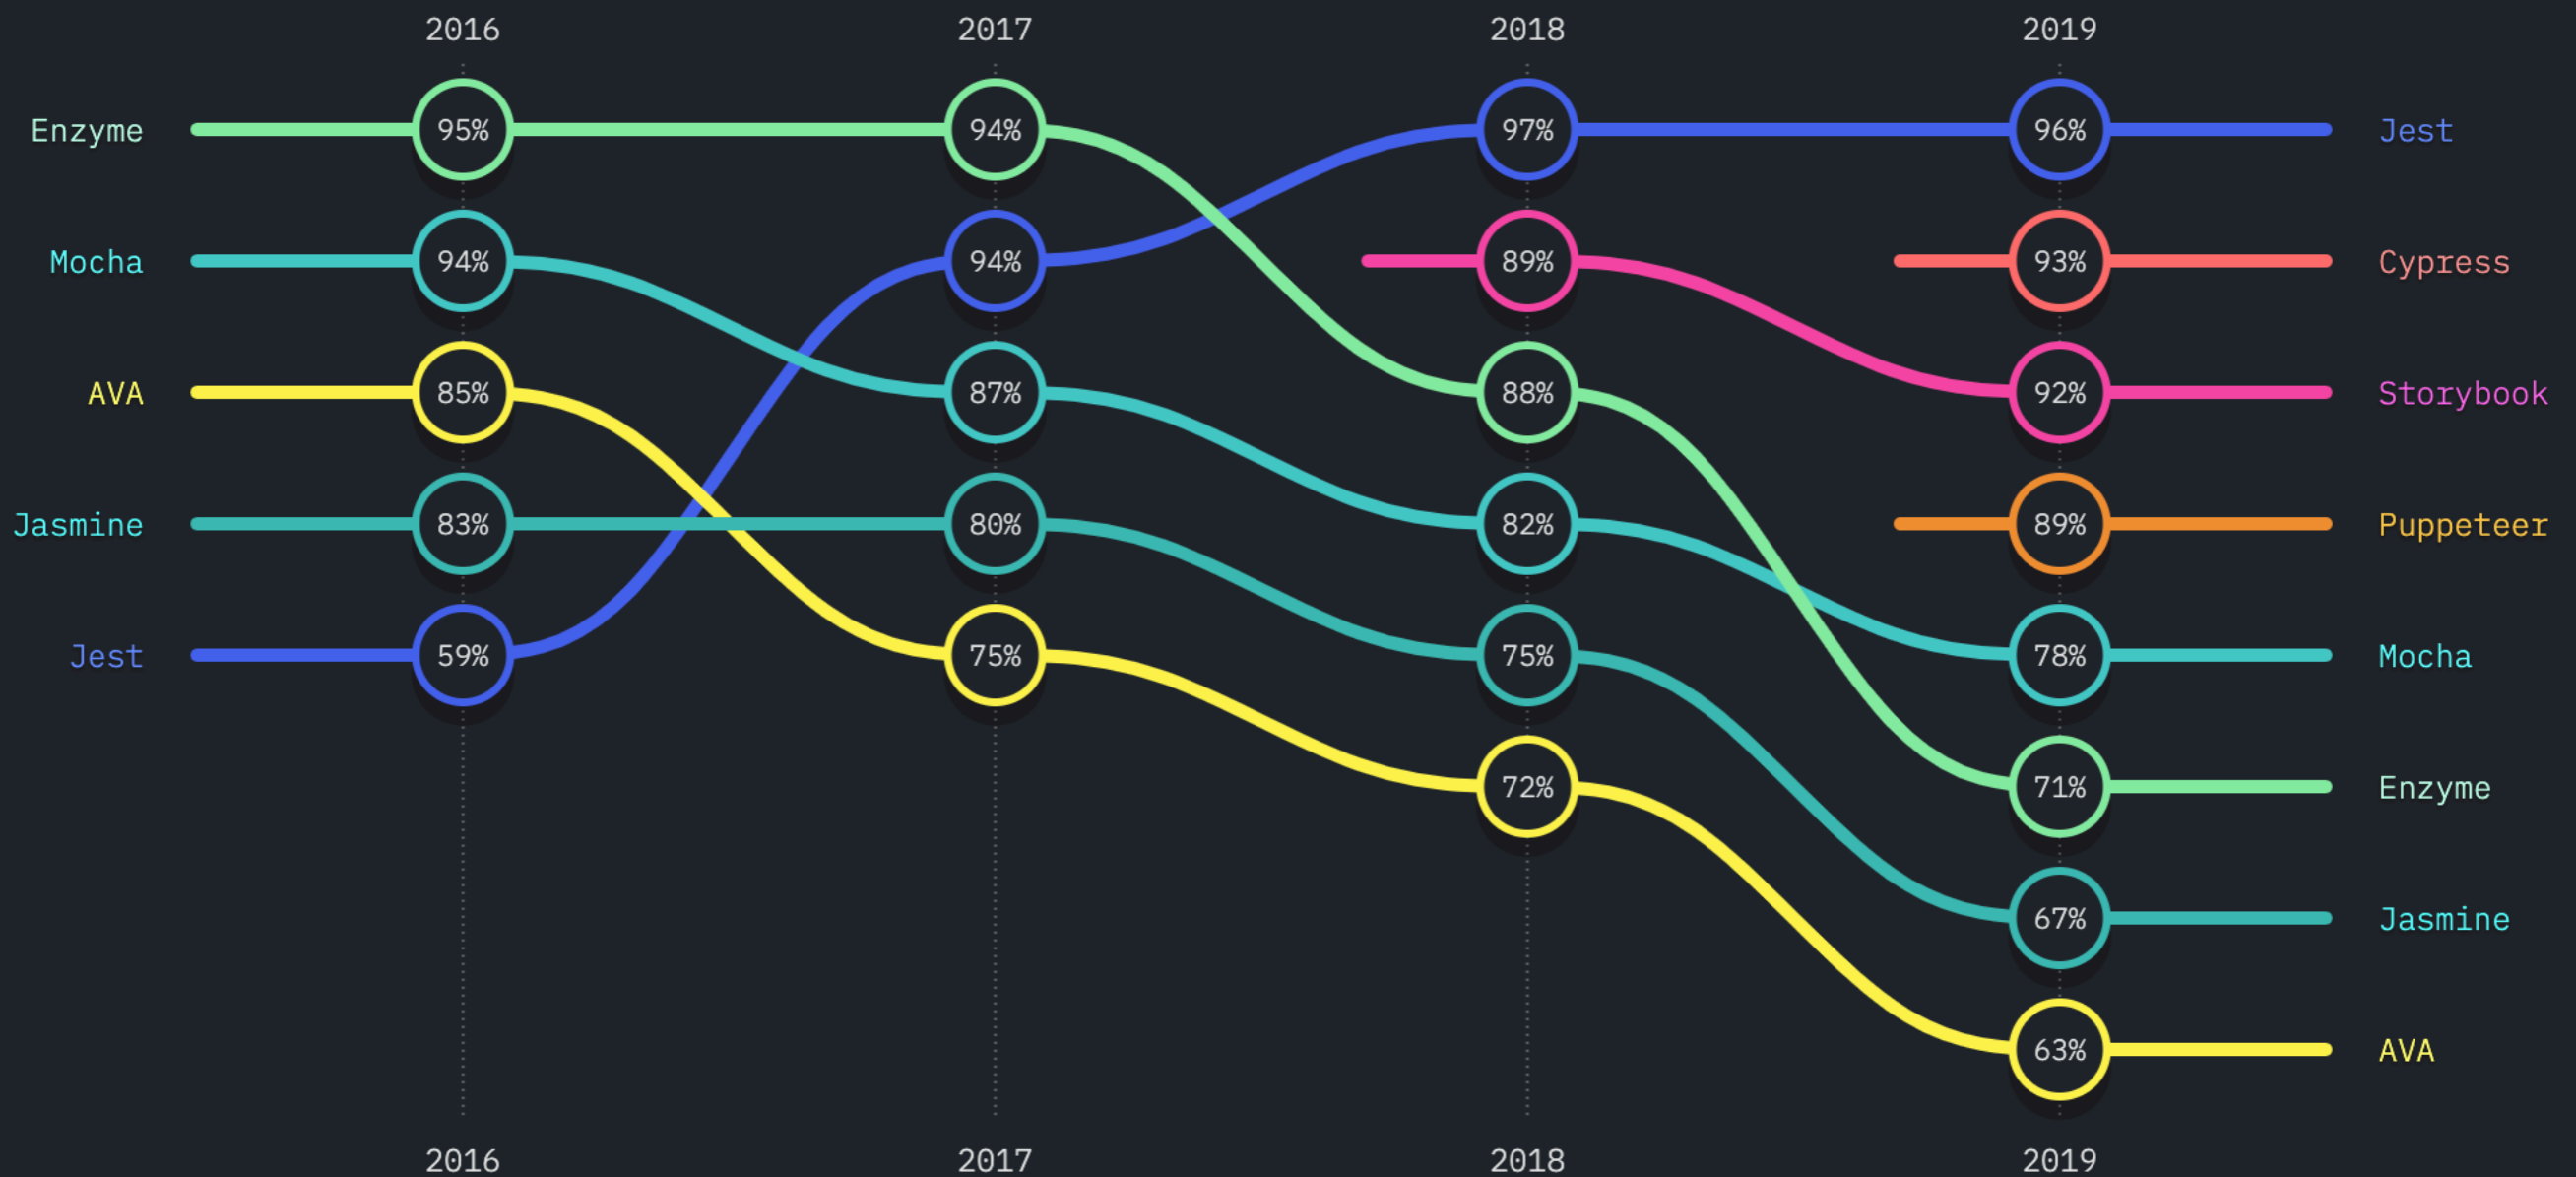

WebdriverIO

A Node.js bindings implementation for the W3C WebDriver protocol.

webhint

webhint is a linting tool for the web, with a strong focus on the developer experience: easy to configure, develop, and well documented.

The State of JavaScript 2019
