

Grow with Intel in Open Source World

Dr. Shane Wang

Special Contribution Award Winner

Engineering Manager at Intel OTC

Individual Director of OpenStack Foundation

Agenda

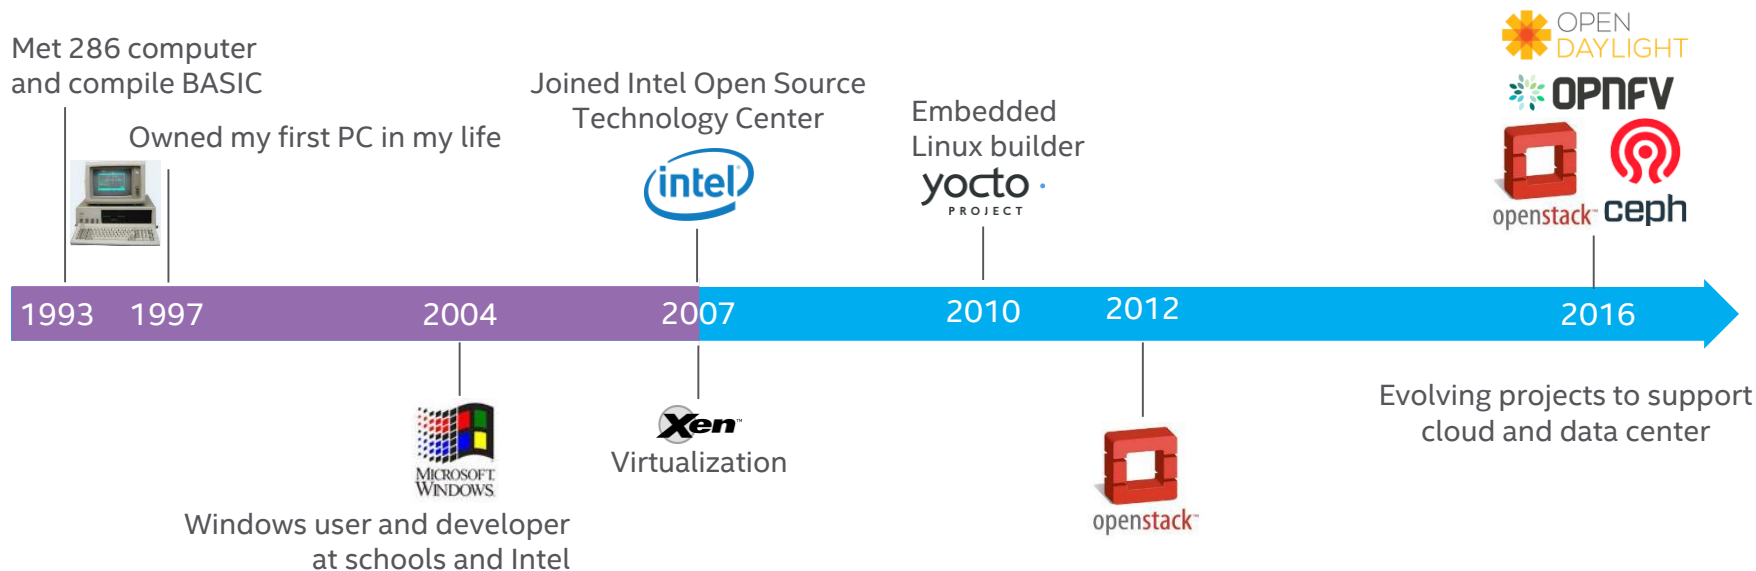

- About Shane Wang
- My Journey in Open Source
- My Contribution to Open Source and OpenStack
- Open Source @ Intel
- My Plan for Future

About Shane Wang (王庆)

- Born in May, 1977 in Nanchang, Jiangxi Province in south of China
- Studied in Nanchang, Xiamen, and then Shanghai, and now lives in Shanghai
- Got PhD degree on computer science from Fudan University in 2004, and joined Intel
- Now acts as engineering manager on cloud at Intel OTC

My Journey in Open Source

My Contribution to Open Source and OpenStack

- Code contribution to Open Source since 2007
 - One of the major contributors and maintainers of tboot - an open source pre-kernel/VMM module for dynamic root of trust
 - CPUID-spoofing, memory online and offline in Xen
 - A couple of Yocto releases for embedded Linux
 - OpenStack feature implementation in Nova (Compute), Ceilometer (Telemetry), Keystone (Authentication), Cinder and Swift (Storage), Watcher (Optimization), etc.
- Leadership
 - Elected to be Individual Director of OpenStack Foundation board in 2015 & 2016
 - Grew core developers in Nova, Ceilometer, Keystone, Watcher etc. in OpenStack
- Influence
 - An amount of speeches at Forums, Meetups, Workshops, Conferences etc. since 2014

OpenStack Foundation

Founded in 2012 and now is the 2nd largest foundation behind Linux Foundation, containing 50,000 members

Technical Committee

Board of Directors

User Committee

Board of Directors » OpenStack

www.openstack.org/foundation/board-of-directors/

Aptira has been a member of the Board since its inception. We are a startup headquartered in the Asia-Pacific region, and as such bring a different view to the board table on many topics. **We feel that this diversity of opinion, stemming from our location and size, is of great importance to the quality of the board's work.**

I am committed, as is all of Aptira, to the success of OpenStack across the entire spectrum of the IT industry. We will continue to push for positive change to OpenStack at all levels, from the Board down to grassroots organisation and participation.

Shane Wang

Type of Director
Individual Representative

Company
Intel

Bio
Shane Wang is an individual board member of OpenStack Foundation in 2015 and an engineering manager of the Datacenter and Cloud Software (DCS) team at the Open Source Technology Center (OTC), Intel. Shane joined Intel in 2004 after he graduated from Fudan University and got his Ph.D. degree in Computer Science, and since 2007 has been working on open source technologies, spanning low-level Virtualization Technology (VT) in Xen and KVM, maintaining boot - an open source trusted boot solution, Yocto, and managing embedded solutions. Since 2011 Shane has focused on OpenStack, with his team working on Nova, Ironi, TripleO, Magnum, Congress, Watcher, Horizon, Keystone, Neutron, Ceilometer, Cinder, Glance, and the 3rd party CIs. He led the team and co-authored two books OpenStack Design and Implementation in 2015 and System Virtualization in 2009.

Tim Bell

Type of Director
Individual Representative

Company
CERN

Bio
Tim is responsible for the group at CERN, the European Laboratory for particle physics, which manages the compute infrastructure for 13,000 physicists around the world to support fundamental research. He previously worked as a Unix kernel developer at IBM along with managing large scale Unix production deployments and services for Deutsche Bank in Europe.

OpenStack Bug Smash

Books

- Drove the team to write the first theoretical book on system virtualization in Chinese
- Published in 2009

- Led the team to write the first book on OpenStack development in Chinese
- Published in May 2015, and got 6 batches and 11,000 copies
- Now on the edition 2

OpenStack Ecosystem in China

OpenStack Ecosystem in China

- More and more companies joined OpenStack
 - Huawei, 99cloud, EasyStack, Awcloud, Kylin cloud, UnitedStack, China Mobile, Letv Cloud Computing, ZTE Corporation, UMCLOUD, xiangCloud, Huron, NetEase, H3C, etc.
- More and more companies adopted OpenStack
 - China Mobile, China Telecom, Shenzhen Stock Exchange, Bai Lian, State Grid, UnionPay, Hubei Province Gov, etc.

workloads

Align

the industry to
accelerate cloud
deployments

My Plan for Future

- Focus on two hardest and hottest areas in cloud
 - Storage & Network
- Continuously engage in advanced technologies and projects, besides OpenStack
 - Containers, Kubernetes, Ceph, ODL, etc.
- Promote open source primarily in China and Asia for cloud and data center to increase adoptions
- Closely collaborate with partners in the ecosystem
- Support our customers sincerely to make WIN-WIN with open source
- Innovate for new cloud technologies and projects, and open source
