A New World and Challenge

1. Digital transformation brings the integration of digital technology into all areas of business.
2. Corporations have deep understanding for open source software development model .
3. Relationship between engineers and corporations.

Deteriorated motivation of software developers

- Close to applications ?
- New technologies ?
- Large scale systems and platforms ?

“Tiny software”
but plays important
roles for a system

Young engineers stood up though they didn't know the open source software age

IssueHunt

https://issuehunt.io/

What Is IssueHunt?

IssueHunt is an issue-based bounty platform for OSS.

Since the launched of IssueHunt in July 2018, over 12,000 OSS projects have listed their repositories on IssueHunt.
Popular open-source software such as Jekyll, Material UI and node-webkit are listed as well.
And also, tens of thousands software developers are participating in the IssueHunt and earn money via solve open-source's issues.

IssueHunt platform is backed by brilliant sponsors such as SIOS, LINE, SoftBank, Microsoft and so on.

IssueHunt's mission is "Make open-source sustainable".

SIOS Technology, Inc. is the sponsor for

Dev

https://devtoken.rocks/

What Is Dev?

Dev is a token for sustainability.

On Dev, you can tokenize open activities such as Open Source Software, Open Access papers, and monetizes your activities that couldn' t make money before.

Using blockchain, Dev evaluates socially valuable activities according to the amount of activity and turn them sustainable.
Since its launch in August 2018, the world' s most influential developers have become users, giving token rewards to OSS with 7.4 billion downloads per month.
Anyone can start Dev without changing licenses, codes, and support. Just publish your open-source to npm.

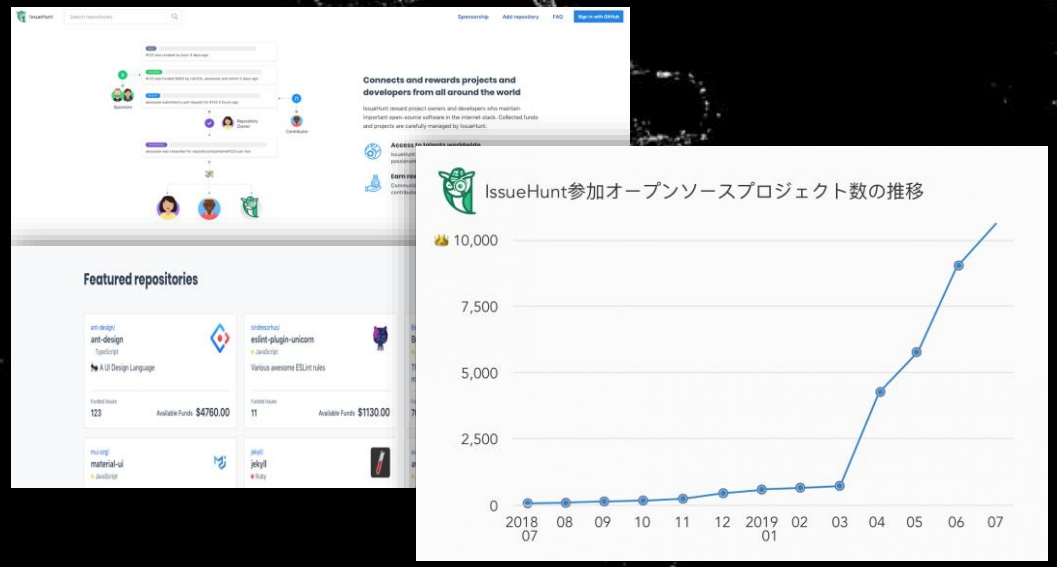
IssueHunt

A service that open source developers around the world can receive rewards



Increase developers contributions by 6x

Over 40% of issues with funds have been solved

Launched in 2018, IssueHunt is the issue-based bounty platform for open source projects. The purpose is to encourage those open source developers who are not appropriately rewarded no matter how much they contribute to the technology evolution.

IssueHunt offers a service that financial rewards grant to whoever solves a given open source project Issue (bug fixed or feature added) through GitHub account. It significantly and directly improves the sustainability of the open-source ecosystem overall.

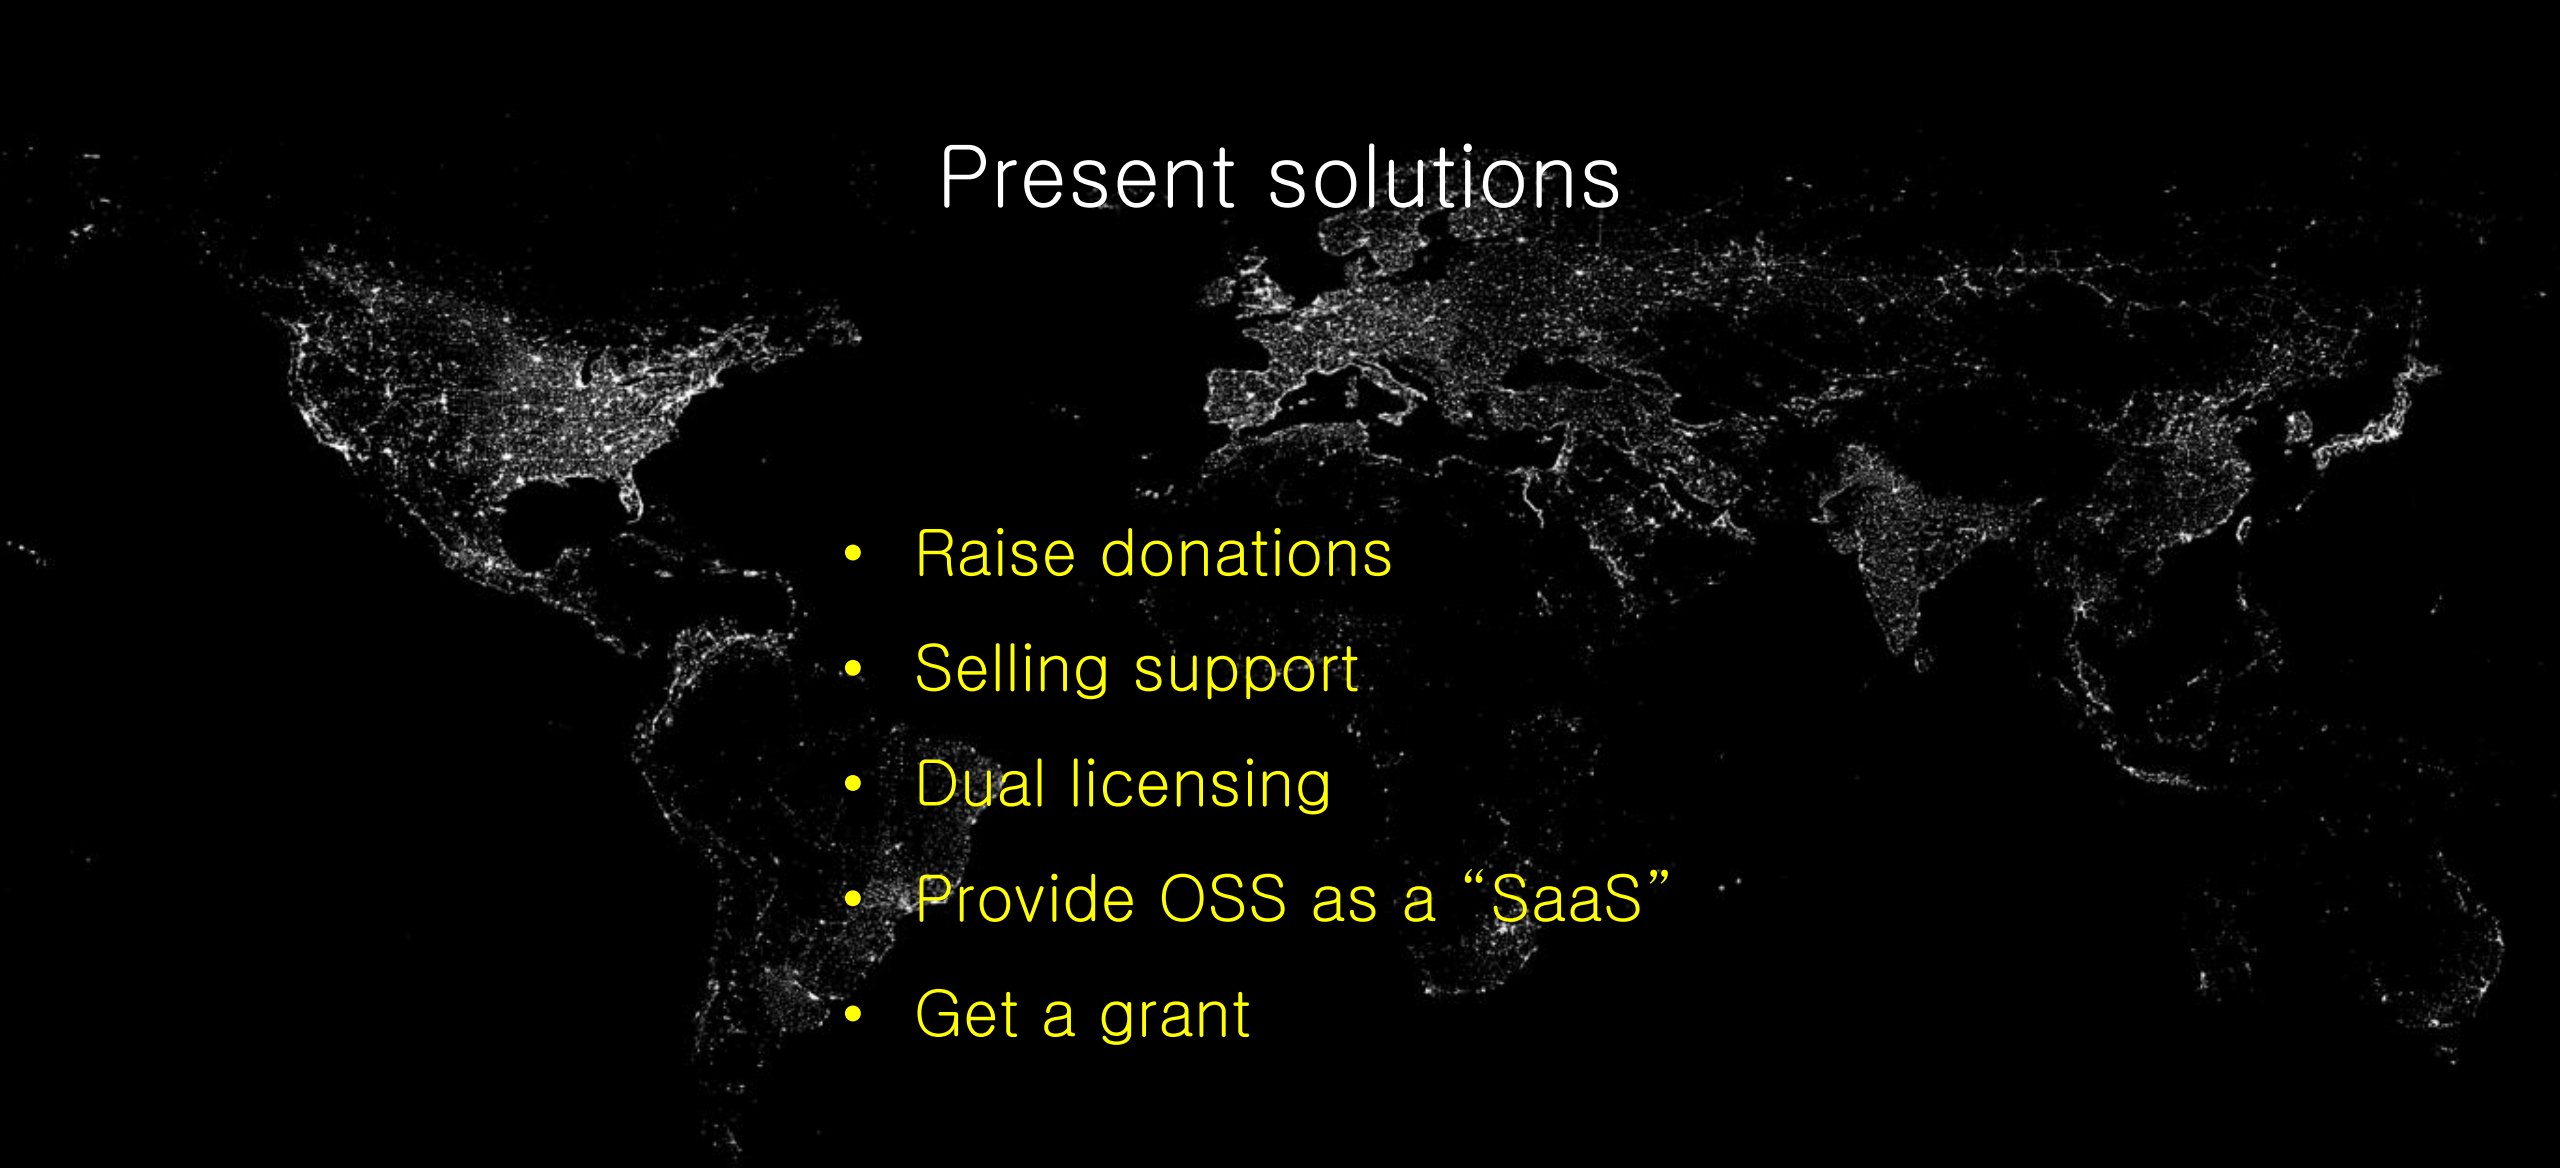
Present solutions



- Raise donations
- Selling support
- Dual licensing
- Provide OSS as a “SaaS”
- Get a grant

© SIOS Technology, Inc. All rights Reserved. © BoostIO, Corp. All rights Reserved. © FRAME00, Inc. All rights Reserved.

Present solutions

- Raise donations
- Selling support
- Dual licensing
- Provide OSS as a “SaaS”
- Get a grant

These have created many short-lived and poor projects.

Dev

devtoken.rocks

Dev is a protocol using Ethereum.

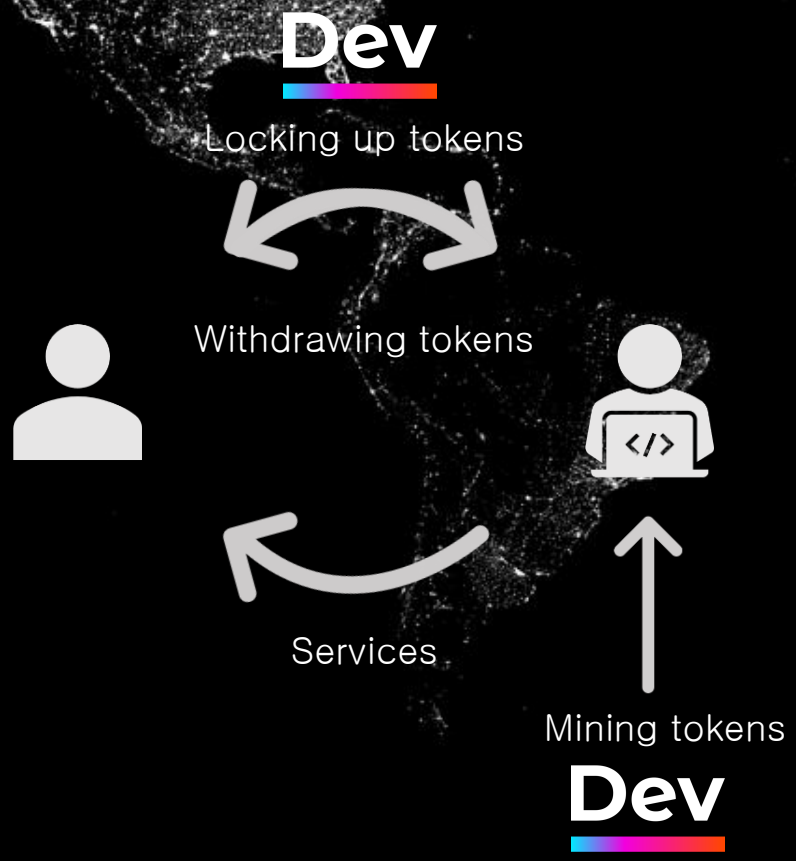
Monetize open assets like OSS without losing user money.

It's a settlement system of a new generation.

And it's updating by the community, neutral, and no fees.

© SIOS Technology, Inc. All rights Reserved. © BoostIO, Corp. All rights Reserved. © FRAME00, Inc. All rights Reserved.

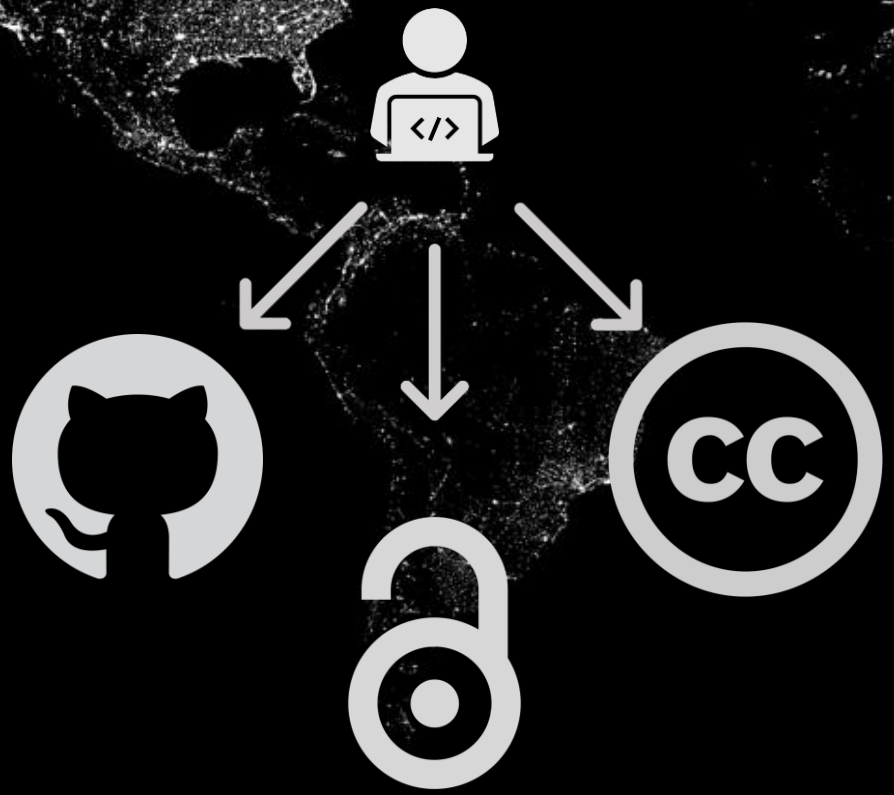
A completely new settlement mechanism



- Lock-up, not payments
- So, money grows(by volatile)
- Everyone gets economic benefits

© SIOS Technology, Inc. All rights Reserved. © BoostIO, Corp. All rights Reserved. © FRAME00, Inc. All rights Reserved.

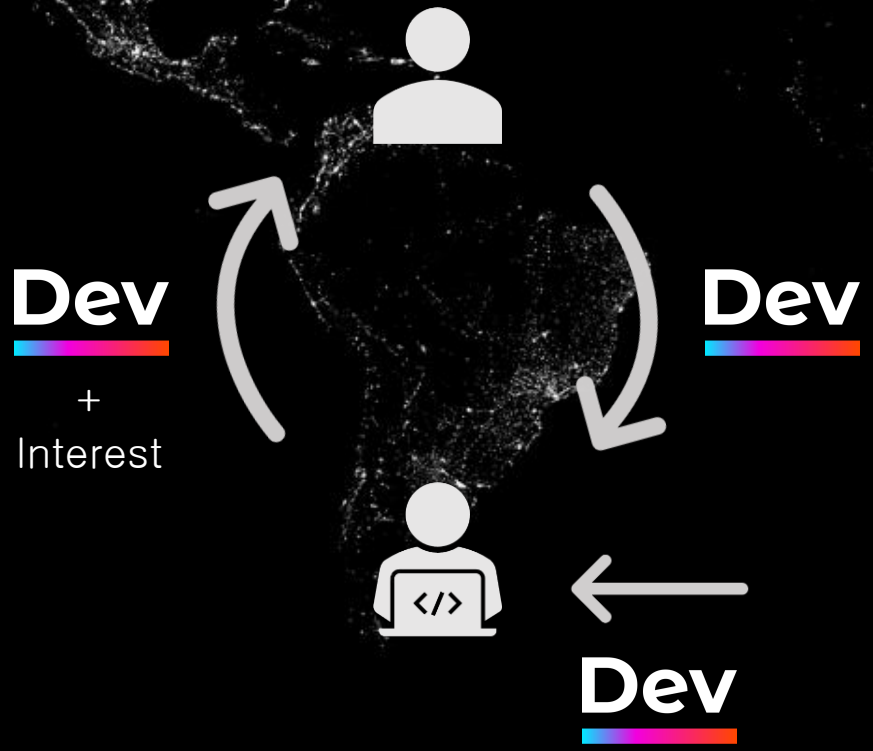
Users have many assets



Securitize any assets. And get rewards based on asset values. It continually enhancements its assets by the community.

© SIOS Technology, Inc. All rights Reserved. © BoostIO, Corp. All rights Reserved. © FRAME00, Inc. All rights Reserved.

Life cycle



Users locking-up and receive interest. Developers and creators get more rewards by more lockups. The protocol adjusts token deflate/inflate and makes money.

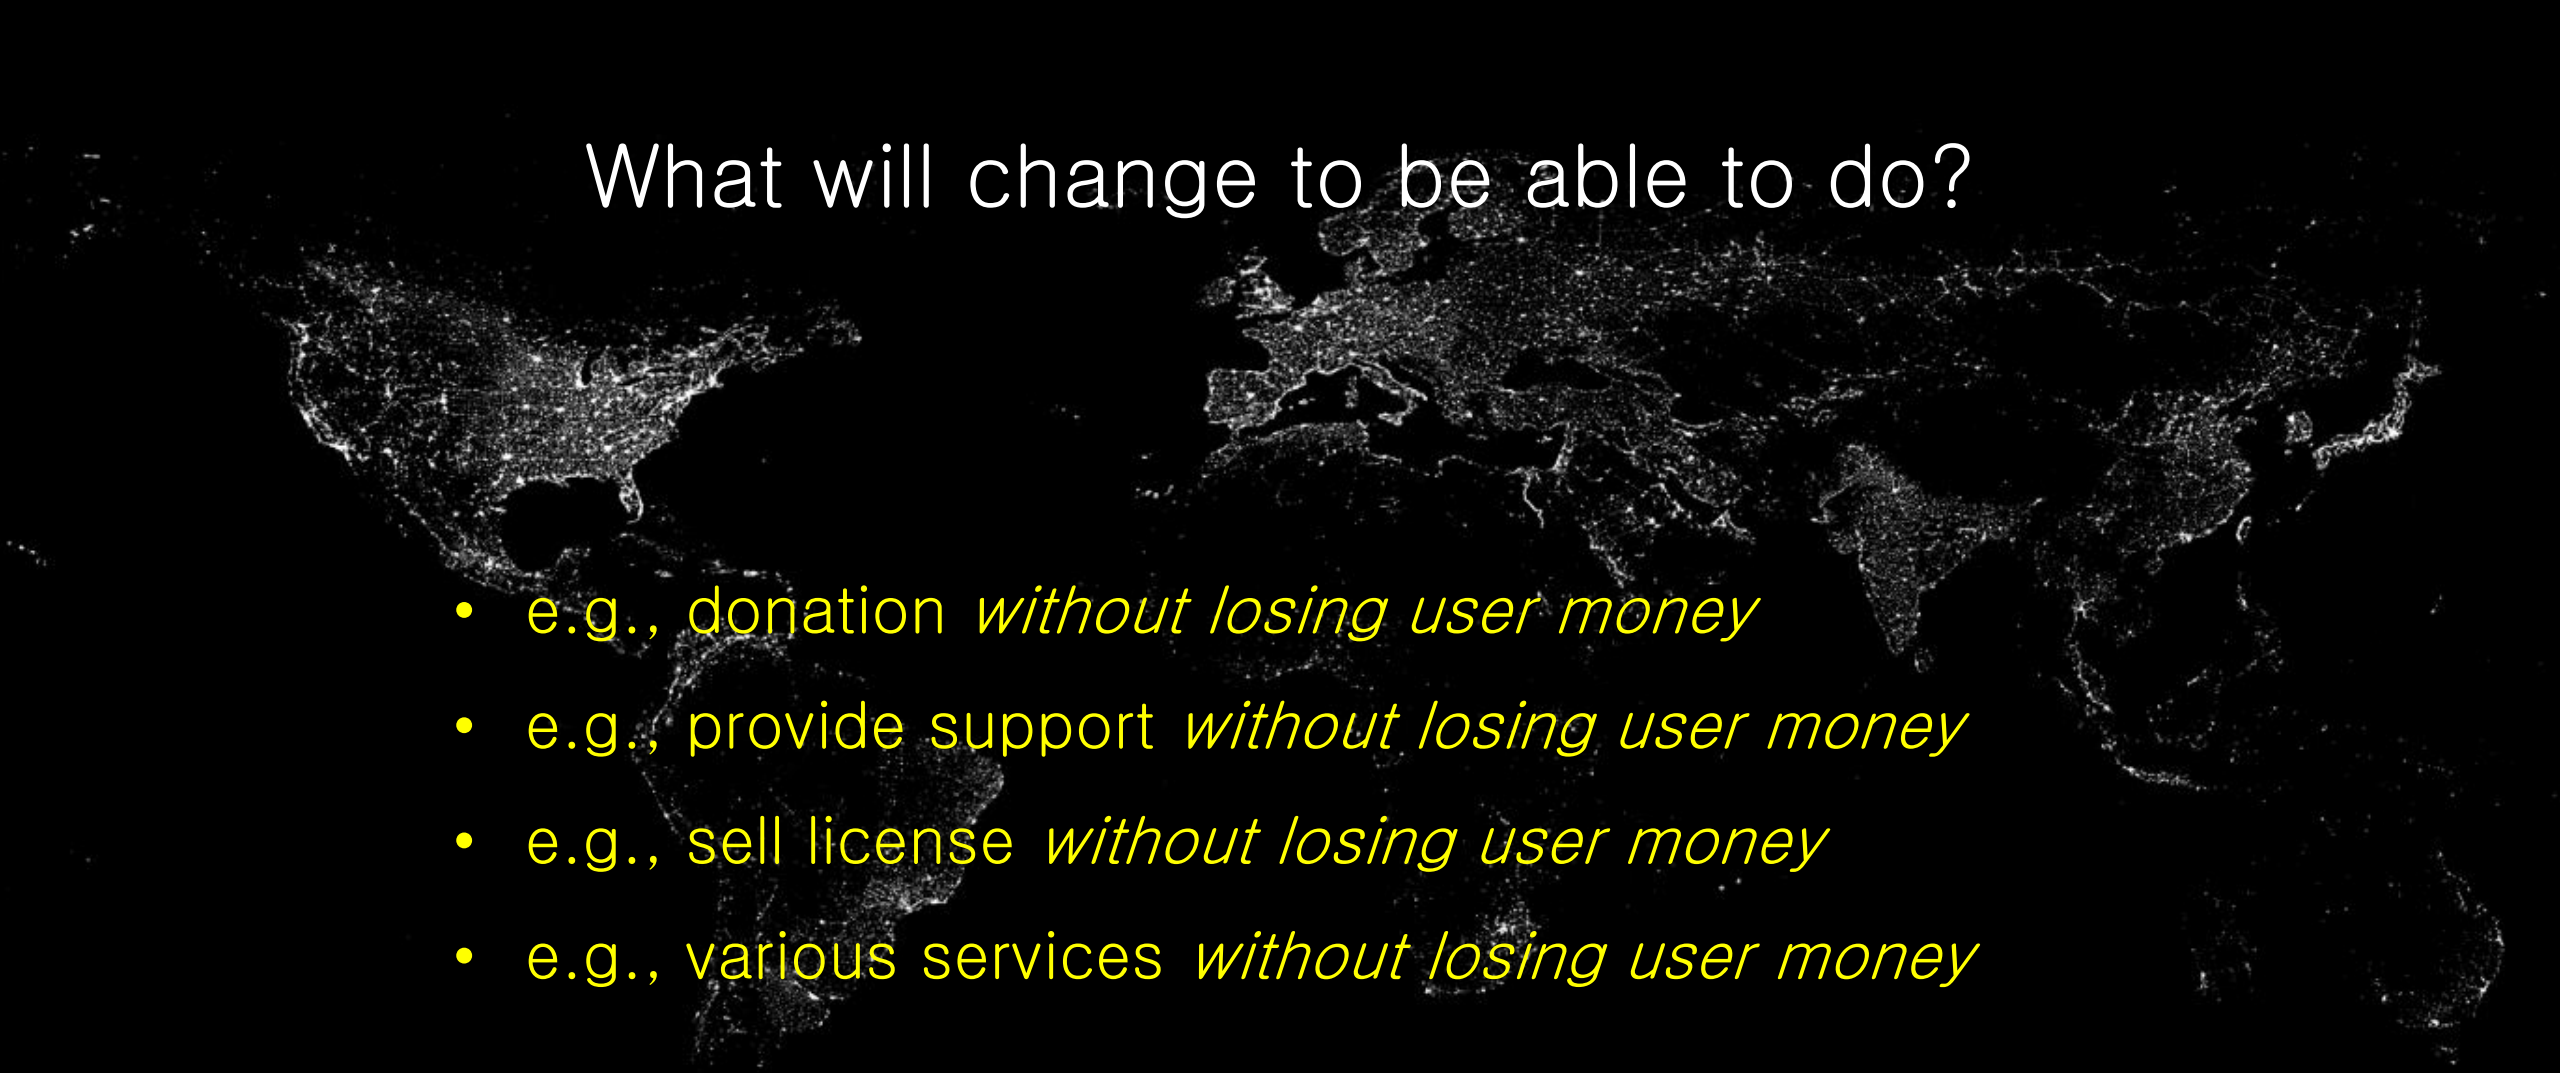
© SIOS Technology, Inc. All rights Reserved.
© BoostIO, Corp. All rights Reserved.
© FRAME00, Inc. All rights Reserved.

We are neutral

- Community-driven asset markets definition
- Community-driven asset valuation
- Community-driven governance
- And forever no fees

© SIOS Technology, Inc. All rights Reserved. © BoostIO, Corp. All rights Reserved. © FRAME00, Inc. All rights Reserved.

What will change to be able to do?



- e.g., donation *without losing user money*
- e.g., provide support *without losing user money*
- e.g., sell license *without losing user money*
- e.g., various services *without losing user money*

There is volatility, but the protocol has an incentive to voluntarily deflate/inflate
